PUSH EMAIL PUSH CONTACTS PUSH CALENDAR

MobileCliqu is a fully managed service that pushes new email, contacts, and calendar events to all your devices. So your PC, Mac, and iPhone (or PDA) stays in perfect sync without docking. And that's just one of many ways mobileCliqu simplifies your life. Based on Microsoft Outlook Exchange Server, it lets people share information and work together productively, in a way that is otherwise impossible.

MobileCliqu gives you all the benefits of Microsoft Exchange Server, but without the high cost or maintenance. It is available as an on-site hosted service.

No investment in hardware or software required, just a flat monthly fee plus a per user (mailbox) fee.

RightCliqu provides all the hardware, software, maintenance, and ongoing support for MCAs and agents. It's a flexible solution that scales with your business and budget.
